## **Radon Series Firmware Update Procedures**

- 1. Follow the below link to download Radon Series PC interface software. https://drive.google.com/file/d/0BxUWOOMINp5qVnZiY2JmUlZCUEE/view?pref=2&pli=1
- 2. Decompress the TP\_Radon USB link V2.0.rar to TP\_Radon USB link V2.0.exe file and install the Radon Series PC interface by execute TP\_Radon USB link V2.0.exe.

1

3. After installation complete, click the logo Software to open the PC interface first, then follow

below one of two methods to connect the speed control to the PC interface.

## Method 1: Connection with the use of USB device

Method 2: Connection with the use of setting card

4. Just like the below, select "Firmware Update" icon, click the "Update" icon and then select the "RS-Code-V2\_x.xup" firmware. After the firmware file is selected, it will be started update until 100% data transfer is completed. After that, the firmware update has been finished.
